

## Company Profile

**Date: February 2018**

<b>Founded</b>	01.07.1994
<b>Founders/ CEOs</b>	Dipl. Inform. (Univ.) Dieter Hess Dipl. Inform. (Univ.) Manfred Werner
<b>Company</b>	3S-Smart Software Solutions is the manufacturer of CODESYS, the market-leading, manufacturer-independent IEC 61131-3 automation software. The company's core products are the development tool "CODESYS Development System" and the corresponding platform independent Runtime System "CODESYS Control". CODESYS is used by manufacturers of industrial controllers, companies that automate machines and plants and system integrators. 3S-Smart Software Solutions is ISO 9001:2008 certified.
<b>Employees</b>	150
<b>Turnover 2016</b>	19 million €
<b>Products</b>	<p><b>CODESYS</b> is the manufacturer independent IEC 61131-3-automation software. The system is the basis of a comprehensive suite which covers the entire software side of automation.</p> <p><b>CODESYS Engineering</b>        Modern editors, debugging functions and integrated compilers allow for an easy handling of all engineering tasks. Device manufacturers can easily extend the development interface to suit individual requirements. Add-on products from the CODESYS Store can be used optionally to complement the functionality.</p> <p><b>CODESYS Runtime</b>        In order to be able to execute automation applications, the CODESYS Control runtime system must be implemented on the target device. Toolkits allow for a fast and flexible implementation and adaptation to the specific features and requirements of the target devices. The CODESYS Store provides SoftPLC systems for common hardware platforms, such as Raspberry Pi, BeagleBone Black or PFC200 as full products. By installing these SoftPLC systems on the stated hardware platforms, users create PLCs compatible with CODESYS.</p> <p><b>CODESYS Visualization</b>        The CODESYS Visualization helps users to develop and animate professional interfaces for test, commissioning and operation of machines and plants. Thanks to the seamless integration in the CODESYS development environment, the system provides functions and display variants which are not available in other standard tools, e.g. directly on the PLC or on the web browser*.</p> <p><b>CODESYS Fieldbus</b>        Automation tasks can be done much more efficiently with integrated fieldbus configurators and protocols. CODESYS supports standard fieldbus systems, such as PROFIBUS, CAN or real-time Ethernet with integrated implementations.</p> <p><b>CODESYS Motion + CNC</b>        Field-tested motion control components turn the IEC 61131-3 development system into a complete solution for motion tasks: Integrated editors/configurators for applications with cams, 3D CNC with DIN 66025</p>

## Products (continued)

description and robot axis groups allow for motion planning. Platform-independent library POU's for axis control (e. g. according to PLCopen), interpolation and kinematic transformation calculate the path during runtime on the controller.

### CODESYS Safety

CODESYS Safety SIL2 and SIL3 are integrated safety products certified to IEC 61508 by TÜV. Components in the runtime and programming system help accelerate the development of safety controllers. Moreover, users can develop their safe systems with an EtherCAT network directly in CODESYS on the basis of CODESYS Safety for EtherCAT Safety Modules.

### CODESYS Services

Numerous interfaces and toolkits help customers adapt the powerful functionality of CODESYS to their specific requirements.

If required, 3S-Smart Software Solutions offers professional adaptation support. Practice-oriented trainings and qualified consulting for efficient application development help users solve their automation tasks.

---

## Sales/Service

The 3S-Smart Software Solutions Sales staff, subsidiaries in Milan/Italy and Beijing/China as well as distributors in the major target markets throughout Europe, America and Asia take care of the customer base consisting of more than 400 manufacturers of programmable automation components. Technical support and application support are also available on site.

The CODESYS Store is an online marketplace for add-on products both free of charge and with costs that can seamlessly be integrated in CODESYS, for example plug-in components for efficiency enhancement, libraries or sample projects. Beside the products offered directly by 3S-Smart Software Solutions the Store also offers third-party products.

End users can choose their hardware among an extensive pool comprising hundreds of different devices which are all compatible with CODESYS.

Qualified support and free information channels such as RSS feeds, the online platform "CODESYS Forum", webinars and a special CODESYS channel on YouTube round off the service offer.
